Sprint 1: Buffets and Samgyeopsal Places in Iloilo

Scrum:

is a lightweight framework that helps people, teams and organizations generate value through adaptive solutions for complex problems [1].

Sprint Planning:

This Sprint is important as it is the part where I brainstorm the most – from searching about the data needed, towards corelating my thoughts and ideas with the people that I came on a particular place with (so as not to be bias with the reviews), and towards even studying up the languages to be used both in the frontend and backend. It is also where I need to imagine and visualize how my webpage would look like.

As mentioned, this Sprint is more focused on planning and brainstorming of the possibilities and the do's and don'ts in the future project.

Daily Scrum:

To brainstorm ideas for the following:

- UI and UX of the website
- Formulate reviews.
- Check up on 'Places to Visit' and look them up.
- Study on the languages to be used.
- Etc.

Sprint Review:

- Formulated both the initial Wireframe and Sitemap of the Website
- Eliminated unnecessary facts (that was thought to be important at first)
- Successfully listed down places that I visited.
- Successfully tallied up the Pros and the Cons of each Place
- Successfully formulated reviews of each said place.

Sprint Retrospective:

For the Upcoming Sprints, as the brainstorming parts for the content of the website is almost already gathered, application and the practical implementation for the development of the site is suggested.

Artifacts:

Agile Estimation:

Story points		Value Points:	
55	UI Design, and UX (55 SP).	55	UI and UX, Review, and Tierlist (55)
34	Review (Pros, Cons), Tierlist (34 SP)	34	Location, Places to be Visited (34)
21	Videos (21 SP),	21	
13	Places to be Visited (13 SP)	13	Images (13)
8		8	
5	Images (5 SP)	5	
3	Location of said Places (3 SP)	3	
2	About me (2 SP)	2	Videos, About me (2)
0		0	

with that said:

Bang for the Buck(s):

- Locations: **11.333 BFTB**
- Images: **2.6BFTB**
- Review and Tierlist: **1.617 BFTB**
- Places to be Visited: **1.615 BFTB**
- UI and UX :   **1 BFTB**
- About Me: **1 BFTB**
- Videos: **.09 BFTB**

Product Backlog:

- UI development and Wireframe implementation
- Frontend and Backend development
- Further Practice of needed Languages
- Images
- Tierlist

Sprint 1 Backlog:

WHY : Brainstorming for Site Content, Wireframe, and Sitemap

WHAT: Site Content e.g., Locations, Images, Reviews, Tierlist, etc.

HOW : towards Development side on the next Sprints
